Microzine

Please Accept the Best Educational Software to Try FREE for 10 Days.

Dear Friend:

Would you like your child to excel at the latest computer skills? If so, I'd like to offer you a program to try out in your own home FREE, that will help you achieve your objective.

We at Scholastic have been leaders in creating learning materials for over 65 years. Four years ago, recognizing a tremendous lack of quality software for young students (you no doubt discovered this, too), we set out to create from scratch a series of unique computer programs to meet the learning needs of a new generation.

The result is MICROZINE, a bi-monthly software series to help youngsters use computers to master basic skills better and faster.

- Building and using a database
- Reading for details and comprehension
- Discovering the power of computer graphics
- Using logic and reasoning to solve puzzles and games

Each program is designed to teach skills your child needs in school now. And, importantly, each program is presented in an easy-to-use and entertaining way — because we know that when students have fun they'll be eager to learn.

Brand new programs are issued every other month, ensuring your child benefits from the latest technological advances in learning software. Your child will be delighted to receive new disks as he or she becomes more skilled and enthusiastic with each session.

I will send you the first MICROZINE disk for a free home trial for a single, very important reason: I am confident that once your child has tried MICROZINE, you'll want every single newly created issue as soon as it comes out. Here's how it works:

When you return the order card, we'll send you the first 4-program free trial disk. If you decide to keep it, pay the low introductory price of $4.99 (regular retail price is $29.95). If you are not delighted, send it back and we will send you nothing further.

If you don't cancel, we will send you, on approval, a new disk with 4 new programs about every 8 weeks. We will bill you $29.95 — that's just $7.49 per program — for each issue you keep. (You can see that our prices are well below most software sold in stores!) You can return any disk you don't want within 10 days and can cancel at any time simply by notifying us.

You can be confident that with Scholastic, your child will receive the highest quality, most appropriate software available today. And I personally guarantee your satisfaction.

Sincerely,
Richard Khaleel
Richard Khaleel
President

RK/kd

P.S. If you're hesitating, please don't make a decision now about subscribing to Microzine. Try the first disk free and **then** decide, since there's no risk or obligation whatsoever. Just return the postpaid card before 11/30/87.

☐ **YES!** Please send our first 4-program Microzine disk for a FREE home trial. If we are not delighted, we will return the disk within 10 days and owe nothing. If we decide to keep it, we pay the special introductory price of $4.99, postpaid (regular retail value: $29.95). Then, if we don't cancel, about every 8 weeks we will receive on approval a new 4-program disk and free user's guide. We will be billed $29.95 for any disk we choose to keep (that's just $7.49 per program!). We may cancel at any time and are not obligated to buy even one disk.

Here's a sample of the kinds of programs you will receive on your first disk . . .

Malice in Wonderland

1. *Malice in Wonderland*

The citizens of Wonderland have been imprisoned by the Queen of Hearts and her Royal Henchcards. Can you free them? You'll have to face the Joker and his terribly tricky math puzzles. All of the decisions are yours in this fantasy adventure.

Animation Lab

2. *Animation Lab*

Create your own animated movies with this easy-to-use feature. Choose a human, an animal, or a robot to star in your movie, then move them by positioning their limbs and joints for each frame. View your animation as a continuous movie, or in time-lapse mode. You can edit and save your movies.

Calendar!

3. *Calendar!*

Will your birthday fall on a week-end in the year 2000? Who was born on July 4? This utility will tell you! Look at the *Microzine* calendar for daily historical memos. Then create your own calendar and save your own daily, monthly or yearly memos. You can print out your calendars, too.

Estimator

4. *Estimator*

How many floors are in the *Microzine* Building? How many slices are in the pie? Use your best estimating skills to find the answer. You can test your own skills or play against your friends.

Scholastic announces the ONLY expanding software library for expanding young minds.

INVENTIONS
Number of Items Found: 152
WATER CLOCK (1400 B.C.)
INVENTOR: Ancient Egyptians
Real
DESCRIPTION: This clock was a series of buckets that dripped water. The Egyptians told the time by the changing water levels inside the buckets.
OTHER DATA: A "drier" clock was the sandglass. It told time by letting sand trickle from a full glass bulb into an empty one.
